

Pre-sales questions: Can Rhin Jewel be used on Apple Macintosh computers?

Given that the majority of our users are working on Windows OS there is no native version of Rhin Jewel for Macintosh platform.

Even though we have had reports of Rhin Jewel being successfully used with Rhino on Intel Mac with Parallels Desktop or BootCamp, at present we can only give technical support and guarantee that Rhin Jewel will work correctly on Rhinoceros on Windows platform.

We recommend that when you setup your Parallels or BootCamp system, first make sure that Rhinoceros itself is running correctly and only then install Rhin Jewel DEMO. If after 60 days of working with and evaluating Rhin Jewel you are confident that it runs smoothly on your Intel Mac, we recommend you go on with the purchase.
