

Using Rhinoceros : Metal Weights tools is not working on my model, what should I do?

Check if the objects that you are trying to calculate weight are solids (valid closed polysurfaces). Go to Object Properties > Details:

Another reason for this error may be because Metal Weight tool relies completely on calculus made by Rhinoceros "Area" command, and in cases when Rhinoceros is unable to perform

Using Rhin Jewel : Metal Weights tools is not working on my model, what should I do?

the Area calculations, Rhin Jewel will not be able to give you the metal weight. Try it yourself on the object in question: write "Area" in the command line and select your object - if you receive the message that it was not possible, you should try to inspect (and maybe recreate) the object to see why Area command is not giving results.
