

Using Rhinorejewel : Using Koala Interface I can not see all the buttons in the Main toolbar on the left. How can I correct it?

Sometimes when the screen resolution on your computer is configured to low height, or you are using a laptop which cannot display more than 700 pixels vertically, you will not be able to see all the buttons in the Main Koala toolbar on the left. To correct this you should:

1) In the main menu go to KoalaInterface > Koala Options and the pop up window will open:

2) Move the **Main Toolbar Height** slider towards the left and restart Rhinorejewel to see the effect.
