

Using Rhin Jewel : I am trying to register Rhin Jewel 5.0 in order to download the Service Release but I keep getting a "Bad serial number" error.

Problem

you are experiencing is probably due to the fact that the reseller that you bought Rhin Jewel from, had an old release in stock which can not establish the connection

with our server. Contact Tech Jewel [Support](#) to receive the direct link for the latest Rhin Jewel Service Release.

Rhin Jewel has no installation password and the serial number needed for registration is uniquely linked to the USB hardware protection key. Once you have the latest SR, you can easily find out the serial number of your USB key by following the procedure (registration instructions) explained [here](#).

Unique solution ID: #1023
