

Using Rhin Jewel : If I want to run the program at the same time on another computer in another location, do I need a different licence and another USB key?

You can install

and run Rhin Jewel in as many computers as you like (home, work, laptop....)

but you will be able to run it on ONE LOCATION ONLY at the same time, namely the one that has the USB key plugged it.

So, to run Rhin Jewel in a second location at the same time you

will need to purchase another license of Rhin Jewel which will come with another USB key.

Contact your Rhin Jewel reseller if you decide to purchase a second license.
