

*Using Rhin Jewel : I am facing a problem with loading of the Rhin Jewel plugin DLL files. Even when I install them manually (and everything seems to be working), after closing the program it does not load automatically on the next restart.*

According to McNeel support this may be a user permission issue. Go to C:\Program files\Techjewel and right click the folder Rhin Jewel. Choose Properties from the contextual menu and open the Security tab. Assign all permissions (read, write, modify...) for this folder to the current user, click the button Apply and OK to close. Restart Rhin Jewel and check if the problem is solved.
